

From enterprise analysis and scope definition to requirements determination and conceptual design, the Fast Start® in Business Analysis workshop gives analysts a thorough understanding of the entire Systems Development Life Cycle. Replete with both “hard” and “soft” skills, this three-day course builds a sound strategy for analyzing business processes and demonstrates how to apply concepts and practical techniques within the context of an experiential learning environment. Students emerge from this workshop with a solid foundation of business analysis thinking as well as a greater understanding that doing the right things are just as important as doing things right.

Course Objectives:

- Apply concepts and techniques applicable to any tool or methodology.
- Diagnose business process problems and present possible solutions from findings.
- Comprehend the "big picture" and the consequences of decisions.
- Understand how business analysis thinking can help management.
- Collect, document, and organize information.
- Identify and document issues through analysis and interviews.

Audience: Those who need to learn practical system thinking: business systems analysts, managers, information technology (IT) professionals, or other business professionals

Prerequisites: None

Number of Days: 3 days

<p>1 Introduction Defining Business Analysis What is Business Analysis? What is a Business Analyst? (IIBA) Business Analysis Body of Knowledge (BABOK) Today’s Approach to Business Analysis The Systems Development Life Cycle</p>	<p>3 Defining the Project Scope An Approach to Project Definition Step One – Identify Issues Uses for Issues Step Two – Recognize Future Benefits Step Three – Identify the Stakeholders and Sponsor Stakeholder The Project Sponsor Step Four – Diagram the Functional Flow Step Five – Define the Project Objectives and Scope Scope Exclusions Real-World Applications</p>
<p>2 Enterprise Analysis What is Enterprise Analysis? What Has Changed? What Information Should We Gather for Enterprise Analysis? How Should We Collect This Information? Types of Information to Collect Sources of Information How Does Enterprise Analysis Help the Project? Real-World Application</p>	<p>4 Procedure Analysis Preparing for Analysis What Information Should We Gather to Analyze? Why Perform Procedure Analysis? Definitions</p>

	Performing Procedure Analysis	8	Solution Implementation Planning
	Process Flow Modeling		Systems Development Life Cycle
	Why Create Models?		Review
	Symbols Used in Process Flow Models		Phases for Implementation Planning
	Swim Lane Diagram		Planning to Implement the Future
	Guidelines for Creating Swim Lane		Changes
	Diagrams		Visualizing the Project Schedule for
	Process Scripts		Implementing the Solution
	Old Procedure		Step 1 – Break the Project Down into
	Process Script Procedure		Tasks
	Real-World Application		Step 2 – Sequence the Tasks
5	Interviewing		Step 3 – Estimate Time
	Why Interview?		Step 4 – Assign Resources
	Preparing for the Interview		Step 5 – Chart the Plan
	Interview Structure		Real-World Application
	Questioning and Listening Techniques	9	Management Presentation
	Listening for Requirements		Business Case
	Holding the Interview		What’s in this Management
	Real-World Application		Presentation?
6	Requirements, Assumptions, and		Presentations
	Constraints		Rehearsal and Practice Run
	Effective Requirements Practices		Real-World Application
	Requirements		
	Types of Requirements		
	SMART Requirements		
	Identifying User Requirements		
	Assumptions and Constraints		
	Real-World Application		
7	Defining a Solution		
	Solution Definition		
	System Improvement		
	System Redesign		
	Review Project Scope		
	Future State Changes		
	Process Improvement		
	Process Change		
	Systems Development		
	Systems Change		
	Organization Change		
	Impact Analysis		
	Process Improvement Impact		
	Systems Development Impact		
	Organization Change Impact		
	Real-World Application
