
A fast paced 5-day course that is a combination of "Enterprise Linux Systems Administration", and "Enterprise Linux Networking Services." Particular focus is given to translating Solaris and HP-UX skills to Linux.

Course Objectives:

- New hardware discoveries
- Learn new file system maintenance
- Use commands within the default shell
- View and modify file and directory permissions
- Manage processes
- Archive files and perform remote file transfers
- Understand Security administration
- Monitor and troubleshoot system
- Learn virtual hosting and mail services

Audience: Experienced UNIX administrators.

Prerequisites: A good understanding of network concepts, the TCP/IP protocol suite, and basic UNIX security is also assumed.

Number of Days: 5 days
